

AMERICAN CONSTRUCTION is present in Macedonia since December 2007, registered as a resident company but with foreign capital.

Through its continuous and dynamic progress, passing through all phases of development, it has grown into an important construction company in Macedonia and wider.

Our mission and vision is to transform A.C. into a one-stop, global solution provider for lifestyle, including homes, work, leisure, finance and more, becoming synonymous to “Quality Lifestyle across Europe”

To become a valuable company we have adopted a strategy of business segmentation to create different business clusters functioning as different growth engines. These engines will grow and converge into a single entity know as “American Construction”

During the most challenging period for businesses globally, we focused on the timely completion of existing projects through efficient resource optimization and our goal, as always, was achieved!
